# Alex Example

alex@example.com | (555) 555-0100 | Austin, TX, United States | linkedin.com/in/alex-example | github.com/alex-example

Software Engineer with 4+ years building backend systems in Java and Spring Boot. Cut failure recovery time by 80%.

## TECHNICAL SKILLS

- **Languages:** Java, Python, Go, SQL
- **Backend:** Spring Boot, REST APIs, Microservices
- **Data:** Apache Kafka, Redis, Oracle (PL/SQL, SQL*Loader), PostgreSQL
- **Cloud:** AWS, Azure (AKS), Docker, Kubernetes, Terraform

## PROFESSIONAL EXPERIENCE

**Acme Federal | Remote, USA**
*Software Engineer* Jun 2026 – Present

- Develop Java/Spring Boot services and REST APIs for a federal budget system used by 30+ program offices.
- Support a seven-job nightly batch pipeline that loads financial extracts over SFTP with Oracle SQL*Loader.
- Enhance Oracle PL/SQL packages that validate and deduplicate incoming financial records.
- Troubleshoot production batch failures using application logs, Oracle error codes and audit tables.
- Tune reconciliation reports with stored procedures and materialized views.
- Maintain CI/CD deployment workflows and audit-ready processing logs for controlled releases.

**Big Consulting | Remote, USA**
*Software Development Engineer* Dec 2024 – May 2026

- Split Java/Spring Boot transaction services into microservices on AKS, raising throughput by 40%.
- Built Kafka and Redis pipelines for real-time payments, cutting settlement delays by 50%.
- Built Temporal workflows in Go that retry transient failures with backoff, reducing recovery time by 80%.
- Integrated a fraud detection model into backend APIs, reducing fraudulent transactions by 60%.
- Designed SQL Server schemas and T-SQL stored procedures for reconciliation data.

**State University | Denton, TX**
*Graduate Research Assistant* Jan 2024 – May 2024

- Built an AI orchestration platform with LangChain and GPT-4 behind Java APIs, raising labeling throughput by 60%.
- Developed a multi-threaded job scheduler on an HPC cluster, cutting job runtime by 25%.
- Automated Kubernetes deployments with rollback and built Grafana dashboards.

**Data Startup | Hyderabad, India**
*Software Development Engineer* Jun 2021 – Jun 2023

- Built Kafka streaming pipelines for millions of daily transactions, reducing latency by 40%.
- Developed Java/Spring Boot microservices for financial reporting on Azure.
- Led incident triage and root cause analysis as the on-call owner for production systems.
- Implemented blue-green and canary deployments for always-on transaction processing.
- Wrote runbooks that reduced escalation time by 30%.

## EDUCATION

**Master of Science in Information Systems** — State University May 2025
**Bachelor of Technology in Computer Science** — Tech Institute

## CERTIFICATIONS

AWS Certified Developer – Associate • Azure Administrator (AZ-104) • Azure AI Engineer (AI-102) • Linux Foundation LFCS
